Key Skills

- Entrepreneurship: I've developed products from inception, built a team from 1 to 50+; grew the revenue from zero to millions and contributed to a successful acquisition.
- Product Design: In the last 10 years, I've spent most of my time planning and designing UX and UI for different products that helped to build successful business.
- Graphic Design: I can do what a graphic designer is supposed to do I can draw, I can design, and can contribute to print or other production processes.
- Content Design: As a freehand writer I can contribute to content designing for web, app, or any other communication tools and I have been doing it along with product design all through my career.
