

Muhammad Nazimuddaula

Senior UX Designer — UX Architecture · Design Systems · Robotics · Physical AI

Metzingen, Germany · +49 15204651085 · nazimuddaula@gmail.com · linkedin.com/in/nazimuddaula · nazim.uddau.la

SUMMARY

Senior UX Designer with 15+ years across interaction design, design systems, and product strategy — currently translating complex robotic and technical behavior into coherent user experience at NEURA Robotics. Comfortable moving between hands-on design craft and cross-functional leadership, with a constant focus on making complex systems feel obvious to use. Quick to adopt new tools and workflows as the craft shifts, including AI-assisted design.

SKILLS

Core: User Experience Design, UX Architecture, Design Systems, Interaction Design, Product Strategy, Brand & Communication, Illustration, Typography, 2D Animation

Software: Figma, Claude Design, Adobe Photoshop, Adobe Illustrator, Jira, Confluence

Languages: Bangla (Native), English (Fluent), German (A2/B1, learning)

EXPERIENCE

Senior UX Designer — NEURA Robotics, Metzingen, Germany Oct 2024 – Present

- Define interaction patterns for cognitive robotics, an area with no established UX language, working with robotics engineers to determine when interfaces should defer to autonomous robot behavior versus give users explicit control.
- Design high-fidelity interfaces and user flows for Neuraverse, NEURA's robotics simulation platform, serving both engineers programming precise behavior and end users seeking simple outcomes.
- Define the organization's design system, using AI-assisted prototyping to iterate on component logic faster than manual specs, while supporting other designers working within it.

Product Director — KONA SL, Dhaka, Bangladesh Feb 2024 – Sep 2024

- Aligned engineering and business stakeholders on a roadmap balancing user needs with regulatory and technical constraints in smart card fintech.
- Led user research with foreign workers in South Korea to establish a baseline for a planned cross-border financial product.

Head of Brand and Communication — Chaldal (YC S15), Dhaka, Bangladesh Jan 2021 – Jan 2024

- Led a 5-part commercial series end-to-end with an outside director and celebrity talent during a nationwide expansion, managing external stakeholders against a fixed timeline and budget.
- Maintained consistent brand messaging across every touchpoint.

Chief Product Officer — Maya Digital Health, Dhaka, Bangladesh Dec 2019 – Dec 2020

- Led a full redesign of the company's main website and established its first iOS app development process from scratch.
- Contributed to a funding pitch that closed shortly after.

Head of Product Design — Deligram, Dhaka, Bangladesh Jul 2019 – Nov 2019

- Pushed for one unified product experience across mobile and desktop rather than treating them as separate design problems.

Co-Founder and CEO — G&R, Dhaka, Bangladesh May 2010 – Jun 2019

- Built a digital advertising agency and process from scratch in a market with no established playbook, growing and leading a team of 50 over nine years.
- Designed a custom Bangla typeface for Robi, addressing the script's structural demands (conjuncts, matras, spacing); it has remained the brand's identity for over a decade.
- Work featured by Google at Google I/O 2014.

EARLIER EXPERIENCE

Co-Founder, Color Talking (2011–2020) · Creative Consultant, Kormo by Google (2018) · Typographer, Amar Bornomala (2012–2013) · Design Consultant, CARE Bangladesh (2007–2009) · Logo Designer, GIZ Bangladesh · Interaction Designer, eBizzSol (2005–2010) · Graphic Designer, Bull's Eye Communication (2004–2005) · 2D Animator, GlobeKids (2002–2003)

EDUCATION

BFA & MFA in Graphic Design — University of Dhaka, Bangladesh

2001 – 2006

Thesis: Contemporary Bangla Typography
